

## PCA SKIN®

*Serious, Scientific Skincare for Amazing Results*

We are a culture obsessed with skincare products. Whether they tout new technology or ancient formulas, it's always tempting to follow, hope and chase trends – then we quickly toss them aside when we don't see the promised results.

Maybe it's time to get serious – and scientific – about your skin care.

PCA SKIN® uses clinically-backed research to develop safe and effective products using ingredients found naturally in the body to ensure optimal results without unnecessary side effects. Unlike the hot trends that sweep the beauty scene, PCA SKIN® products take years of research and testing to perfect. (However, PCA

SKIN® does not perform or condone animal testing.)

### **What is PCA SKIN®?**

PCA SKIN® develops innovative and highly researched formulations that are available exclusively through doctors and licensed skin care professionals.

Twenty years ago, PCA SKIN® was the first cosmeceutical company to apply years of scientific research to the development of products for professionals and consumers. They are recognized in medical textbooks as the originator of advanced blended chemical peel formulations.

### **What skin issues can PCA SKIN® treat?**

- Fine lines and wrinkles
- Discoloration
- Acne
- Sensitive skin
- Enlarged pores
- Dry skin
- Sun damage
- Rosacea

### **What should I expect during my PCA SKIN® professional treatment?**

Professional-grade peel solutions exfoliate dead skin cells and bring healthy skin cells to the surface, revealing deeper layers of fresh, flawless skin. Monthly

treatments even skin tone, clear acne, reduce wrinkles, improve the appearance of aging skin and make dull complexions glow.

PCA chemical peels slough your skin off slowly, over time, leaving you with hydrated, clear and radiant looking skin. PCA methodology is a low dose approach, which means that you slowly penetrate the outer most layer of the skin with repeated treatment over an extended period of time.

Before your peel, you'll be advised about using PCA SKIN®'s six-step daily care product routine to prep your skin, improving results and reducing the risk of rare complications.

We'll help you determine the best professional and daily treatment regimen for your skin type, concerns and goals.

### **What steps should I take after my PCA SKIN® peel?**

Post-treatment products are designed to minimize the potential for rare side effects. At your consultation, we'll evaluate your skin type and create the most effective aftercare and daily care plans for you.

Optimum results are generally seen with a series of treatments are performed every three weeks to start, then once a month to maintain, but that schedule can vary from person to person.

### **How should I care for my skin at home to maintain my results?**

A complete daily care regimen helps you achieve your skin care goals. Every day is an opportunity to improve your skin!

### **The basics for a PCA SKIN® daily care regimen include:**

- Cleanse - Removes makeup, dirt, oil and other impurities ensuring corrective products are absorbed into the skin.
- Tone - Offers additional nutrients and exfoliation to the skin.
- Correct - Features specific products that address individual skin concerns such as aging, acne, discolorations and sensitive skin.
- Hydrate - Hydrating morning and night will help maintain your results and create younger-looking skin.
- Protect - Apply broad spectrum sunscreen every morning at least 20 minutes before sun exposure. Sun damage causes fine lines, discoloration, inflammation and can eventually lead to skin cancer.
- Mask - Weekly use provides deep exfoliation for glowing skin.
